

Clean the World™

Hospitality Partnership Program

Can something you throw away save a life?

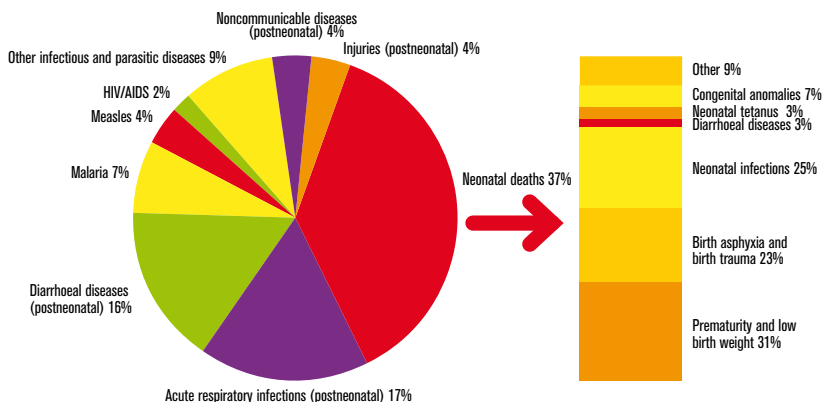

3.5 million children under the age of 5 will die this year to two deadly diseases- acute respiratory infection (pneumonia) and diarrheal disease.

Even more tragic than these staggering facts is that these deaths could be prevented by up to 65% through simple hand washing with bar soap.

Today, in the United States alone, we will throw away between 1 – 1.5 million bars of soap.

You can help. Each month your hotel discards slightly-used soap and shampoo. These products often end up in already overflowing landfills and contaminate fragile groundwater systems. With the donation of your discarded soap and shampoo products to Clean the World, we will be a step closer to reaching our goal of saving 1 million lives each year.
